

In researching AVM providers we found RELAR data and systems to be superior to all others we tested. Having MLS based data is invaluable in determining more consistent values for us and our valued clients. At NCCI we are in the face to face borrower contact world and must be the "eyes and ears" for our clients. With RELAR we can now also be the "brain" that adds a clearer picture as to the current reality of the collaterals true value.
